Schools For Rural Madagascar

In Madagascar a dime makes a difference! To construct a simple school building in the poorest areas, approximately 33,000 bricks are needed. One brick costs 40 Ariary ($0.02). One dime buys 5 bricks. Total cost for bricks $660. Parents gladly provide the labor.

Bricks are just the first priority. Each construction project needs other materials (metal roofing, cement, etc.) and classrooms need supplies and simple furnishings.

Buy 5, 10 or 20 bricks. The cost is little and the educational rewards for the children of Madagascar are great!

For more information please contact Sr. Margaret Verhoff at 859-652-6394 or mverhoff@cdpkentucky.org; To contribute to the Dime Project, make checks payable to Congregation of Divine Providence, 5300 St. Anne Drive, Melbourne, KY 41059.
